

Radi-O-Too Biplane by Herb Clukey

Designer Clukey, musician, hobby sales expert, ex-Navy man, has more than a dozen free flight-R/C biplane designs. Larger 41" Jus-Ta-Biplane above was a hit at last DC/RC Symposium. Radi-O-Too has flown with Citizen-Ship U-R and LT-3 receivers. Herb says 020-024 biplane will take any relayless rig, any 3-volt tone set, or any C/W receiver using 9-volt battery like Burgess YL6 and 2 Burgess #7 pencils for escapement. (Model Progress has notes on Herb's latest venture.)
