WSHR006	4	#2 FLAT WASHER			

Great Planes AccuThrow™ Control Surface Deflection Meter

One leading cause of crashes is flying an airplane with its control throws set differently from those recommended in the instructions. The Great Planes AccuThrow lets you quickly and easily measure actual throws first, so you can make necessary corrections before you fly. Large, no-slip rubber feet provide a firm grip on covered surfaces without denting or marring the finish. Spring tension holds AccuThrow's plastic ruler steady by each control surface. Curved to match control motions, the ruler provides exact readings in both standard or metric measurements. **GPMR2405**

Great Planes Bench Topper™

The Great Planes Bench Topper hold the inexpensive answer to building supply storage and organization hassles. It assembles quickly into a 15.5" x 7.5" x 5.25" caddy that fits comfortably on any bench—or can be mounted conveniently on a wall. The lite ply parts simply CA together. Knives, scissors, paint brushes, CA and epoxy bottles, mixing cups...the Bench Topper offers a place for everything. You can even customize its top center-section to suit your special storage needs! **GPMR8500**
